Eighth Year.

HIGHLANDS NURSERY.

[In the Southern Alleghany Mountains; Elevation nearly 4,000 feet.]

ANNUAL WHOLESALE OFFERS OF

Native North American Ornamental Plants

ESPECIALLY THE HARDY TREES, FLOWERING SHRUBS, HERBACEOUS PERENNIALS, VINES, FERNS, ORCHIDS, ETC., OF THE SOUTHERN ALLEGHANY MOUNTAINS. -

TREES, Shrubs and Plants in Large and Smail Sizes, Suitable for Parks, Cemeteries, Streets, Nurseries, Lawns, Gardens and Private Grounds.

HARLAN P. KELSEY,

Highlands Nursery,

LINVILLE, Mitchell Co., N. C., U. S. A.

PLEASE OBSERVE:

Always use the enclosed order-sheet.

Prices herein abrogate all previous quotations.

Packing and delivery at our depot, Cranberry, N. C., free.

Terms: All bills due first of each month. Interest charged thereafter.

Discounts.—Special for cash with order, 5 per cent. On orders of \$25, 5 per cent.; \$50, 7 per cent.; \$100, 10 per cent.; \$200, 15 per cent.; \$500, 20 per cent, 5 plants of a kind at 10 rates, 25 at 100 rates, 500 at 1,000 rates.

Foreign remittances. Send by International P. O. Money-Order, drawn on Asheville, N. C., by New York Exchange, or by Cheque Bank Check.

Claims made immediately on receipt of goods will meet with prompt recognition and be adjusted, if our error. All shipments travel at consignee's risk.

"Collected plants" are those carefully lifted from open woods and usually trimmed before shipping. Our true line is in furnishing strong, nursery-grown stock, but to meet a demand for very cheap stock, we have carefully prepared a schedule of prices, and by our arrangement, a glance shows the price of each plant, collected or nursery-grown. So please order accordingly.

We ship usually from October 1 to December 1, and from March 1 to May 1. Often all through the winter, if mild. (Please order early.)

Our shipments extend over this country and the principal countries of Europe, and our packing is nearly perfect.

NOTICE! NEW FROST-PROOF CELLAR, PACKING-HOUSE AND SHEDS.

NOTICE! NEW FROST-PROOF CELLAR, PACKING-HOUSE AND SHEDS.

Having just completed the erection of a large FROST-PROOF

CELLAR (as well as packing-house and sheds 16x42 feet), I can now promise prompt, safe shipments at all times, especially during cold weather, and would ask my customers to please bear this advantage in mind.

Please write us about anything—our mountains, climate or summer resorts, but especially about plants, native plants, and we may interest you. Our facilities are broad and territory large. And remember, we are the largest growers and collectors of Hardy Native Ornamentals exclusively in this country, and our stock this season is especially fine and strong.

Soil, Planting and Care of Native Plants.

The Azaleas, Rhododendrons, and most other plants herein named are hardy generally throughout the U.S. and with proper care in preparation of soil and planting may be grown successfully. They thrive best in rich, peaty soils and partially shaded situations. A good soil can be made by excavating two to three feet of the surface, and filling with equal parts of good leaf-mold or other decayed vegetable matter and surface loam, with onetenth or more of sharp sand. Swamp muck or field sod may be used. Mulching (spent tan, moss, leaves, hay, etc.) is always useful, and necessary where the ground is very dry. Lime in any form is fatal to Rhododendrons, Azaleas, and ericaceous plants in general. As a rule, give all plants a deep soil, with plenty of well-decayed vegetable food and good dranage, and the results will be satisfactory.

Our Location,

At the summit of the Carolina mountains, nearly 4,000 feet towards the clouds, insures long, cool summers and moderate winters, which is very favorable to the growth of these beautiful native ornamentals, and produces a hardy stock—an important point with Northern planters.

For years the Highlands Nursery has been growing and pushing forward native plants exclusively, and it is extremely gratifying to us to be made aware of the rapidly-increasing demand for them, especially the past season. We anticipate, however, much larger sales, and are prepared with an exceedingly large and fine stock, to which constant additions are being made.

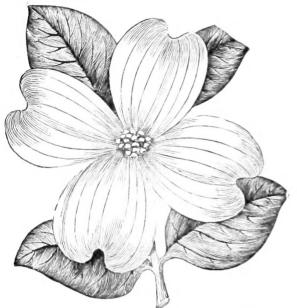

RHODODENDRON VASEYI. 8 to 15 feet high. (See page 15.)

Beautiful new deciduous Rhododendron, introduced by us. Profuse and very early bloomer, through all shades of pink. Invaluable addition for lawn, park, garden and cemetery.

Nurserymen and florists should all catalogue this fine new Rhododendron, and at the prices we offer it, no one need be without it. Large quantities supplied at special rates.

CORNUS FLORIDA (White-flowering Dogwood). (See page 7.)

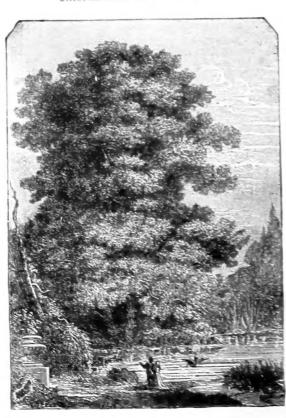

CLETHRA ALNIFOLIA. (See page 14.)

SARRACENIA PURPUREA. (See page 19.)

CHIONANTHUS VIRGINICA. (See page 14.)

FRANINUS (Ask.) (See page 8.)

SOME HARDY NATIVE AMERICAN ORNAMENTALS. HIGHLANDS NURSERY.

DIONÆA MUSCIPULA. (See Page 18.)

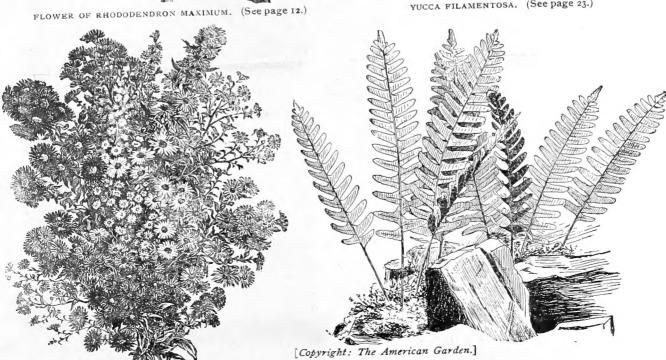

CALYCANTHUS GLAUCUS. (See page 14.)

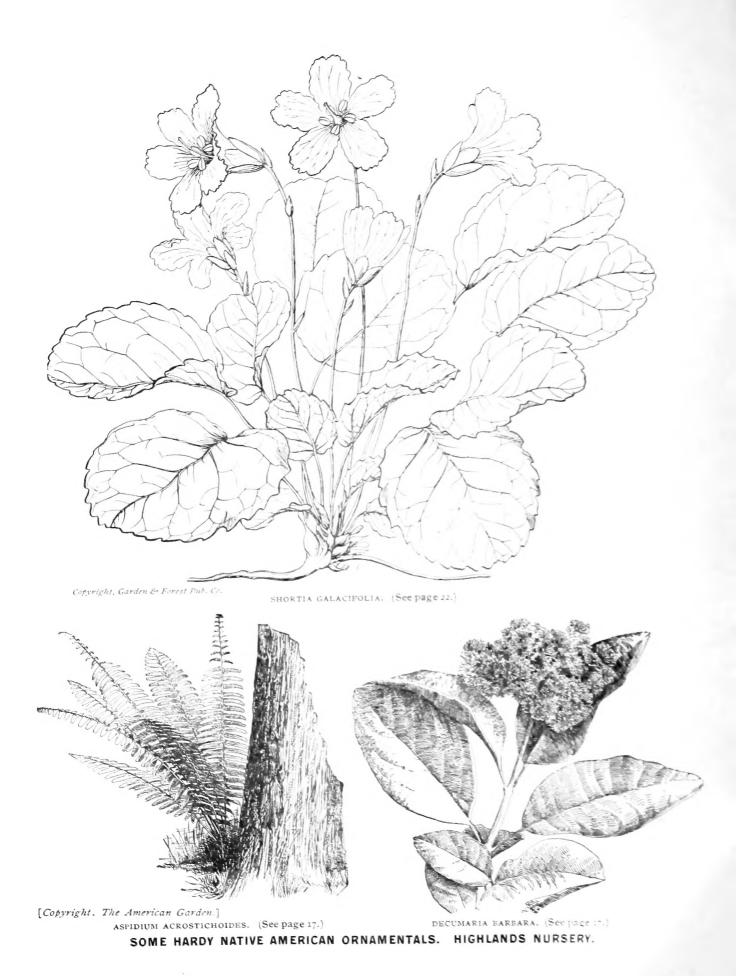

YUCCA FILAMENTOSA. (See page 23.)

BOUQUET OF WILD ASTERS.

POLYPODIUM VULGARIS.

Hardy Native Deciduous Ornamental Trees

For Park, Lawn, Cemetery, Nursery, Street.

"In the Weekly Tribune, Mr. Josiah Hoopes takes strong grounds in favor of native American trees, on the ground that they are less liable to disease in our climate, longer lived, and more beautiful and useful as a class than their foreign relatives."—Senex.

ACER. (Maple.)

These, among the finest of all street and shade trees, need no general recommendation, as the enormous numbers that are planted yearly bespeak their own landscape value and popularity.

MAGNOLIA.

The Magnolias must be classed among the most effective of all ornamentals, combining as they do, rapid, clean growth with the handsomest of large foliage and great wax-like flowers, usually overcharged with a pecuniar and exquisite odor, and later on with a covering of brilliant scarlet *cucumiter-shaped* fruit. For sceric effect our native species will bear favorably a critical comparison with the finest foreign ones, while to the *American planter* they possess the overwhelming advantage of being an indigenous growth, free from disease, and (with the exception of the *Grandifloro*) hardy throughout the states.

Hardy Evergreen Trees.

As a class, our Native American Evergreens are without doubt far beyond comparison with those of foreign countries, possessing unrivalled characteristics of gracefulness, grandeur or color. Our Alleghany region, while claiming possibly fewer species than the Western and Pacific states, is yet rich in beautiful forms, and we can boast of at least one distinct new species of conifer, found nowhere else, and here only very locally, namely, the Carolina Hemlock (*Tsuga Caroliniana*). Below we give a short description of each in proper order:

Varieties.	SIZE AND GRADE.	C	OLLECT	ED.	Nursery-grown.			
		per 10	per 100	per 1000	per 10	per 100	per 100	
Abies Fraseri (Southern Balsam-Fir). 30 to 65 ft	3 to 6 in	\$0 20	\$1 00	\$8 00	\$0 40	\$3 00		
Rather smaller than the northern Balsam, with			1	1	50	3 50	\$30 00	
denser foliage and more compact growth. A large stock of this beautiful Fir at specially low rates.	I to 2 ft., extra	75	5 00	40 00	I CO	7 00	55 00	
Gordonia lasianthus (Loblolly Bay). 30 to 50 ft Large white flowers, 2 to 3 inches across and glossy leaves. Not perfectly hardy.	4 to 8 in				1 50			

ILEX OPACA (American Holly).

This is without doubt one of the most beautiful and indispensable of all evergreens in landscape work. The growth is thick and heavy, assuming a dense, picturesque, cone shape, while the sharp, prickly foliage is always in most beautiful contrast to the surrounding leafage or the winter aspect of lawn and park, as well as forming a conspicuous background for the brilliant scarlet berries which cover it in fall and early winter. This beautiful Holly is always in demand, and I would call the special attention of all nurserymen and planters to our heavy stock of fine plants. (See sizes and prices on page 10.)

Hardy Evergreen Trees, continued. Ilex opaca (American Holly). 15 to 40 ft	6 to 9 in 9 to 12 in 1 to 1½ ft., ex. 4 to 12 in				I CG	95 00 = 00 20 00	60 0
This rare species comes from the coast of Carolina, and may not be perfectly hardy all over the North, though it will stand zero weather without apparent injury. It is, however, an elegant shrub or small tree, with small, smooth, crenate or scalloped leaves. These contain a large per cent. of a strong element, and are used even yet in making tea in localities of lower Virginia, while it is well known as the Yaupon, from which the famous "black drink" of the Southern Indians was made.	4 to 8 in	1 00	7 00	60 60	2 00		
Juniperus Virginiana (Red Cedar). 15 to 35 ft A useful small ornamental, the foliage varying often from a stiff needle-shape to light and feathery.	1 to 2 ft 2 to 3 ft		4 50		: 5		
Magnolia glauca (Sweet Bay). 12 to 30 ft One of the finest in foliage and flower; latter 2 to 3 inches across, and of peculiar sweet fragrance.	4 to 12 in 1 to 2 ft., fine. 2 to 3 ft., h'vy.	I 00	7 00	60 0	1 2 3 :	. :	
Magnolia grandiflora (Great South'n M). 50 to 90 ft Thick, leathery leaves 6 to 10 inches long, and large, broad, very fragrant flowers, 6 to 8 in. broad. Olea Americana (Olive). 8 to 25 ft	1 to 2 ft 4 to S in				3	- 5 00	
From Florida; nearly hardy. Clusters of white, fragrant flowers. Purple fruit. Picea nigra (Black Spruce). 50 to 75 ft		20	1 00	8			
Thick, heavy growth and dark foliage. Pinus pungens (Table=Mountain Pine). 20 to 50 ft Of peculiar growth, the cones remaining on for years, giving the tree a unique appearance.	6 to 12 in	25 50 50 75	2 00 3 50 3 50 5 00	30	· · · · · · · · · · · · · · · · · · ·	3 00 5 00 7 00	***
Pinus Strobus (White Pine). 50 to 150 ft	6 to 12 in 1 to 2 ft 2 to 3 ft	50	3 50				
Pinus australis (Long-leaf Yellow Pine). 60 to 75 ft. The well-known timber and tar Pine of the lower Southern states. The small plants present a most surprisingly tropical appearance, with the light green, 15 to 20-inch long leaves of annual growth clustered perpendicularly on the ends of the shoots like a broom, and bearing a strikingly singular contrast to the leaves of the previous year's growth, which are dark green and droop gracefully downward.	6 to 12 in to 2 ft	7.5 1 25	5 00 10 00	40			
Pinus rigida (Black or Pitch Pine). 30 to 50 ft The straggling growth of this pine prevents its extensive use as an ornament, though as a single lawn tree it is quite effective.	6 to 12 in	75	5 00	40			
Prunus Caroliniana (Cherry=Laurel). 20 to 30 ft This much admired tree is quite commonly used in the South as a fine ornamental. The white flowers are profuse and showy, and present a fine effect, with the always pleasing aspect of the glossy, serrate leaves. As it is not perfectly hardy in our mountains, however, we cannot recommend its extensive	6 to 12 in					20.44.60.0	
planting north of lower Maryland. Tsuga Canadensis (Hemlock). 50 to 100 ft Considered by eminent authorities to be the most beautiful of all American conifers; rich and delicate foliage, drooping branches and dense habit.	1 to 2 ft 2 to 3 ft	7.5	5 00	40 00	1 3.	- 30

Hardy Native Deciduous Shrubs.

One of the most interesting and important features of our varied mountain flora is the large list of beautiful hardy shrubs, deciduous and evergreen, which are so lavishly placed for use within our easy reach, not, we trust, to undergo the ofttimes blighting and prosaic effect of taming, but to come with all their own fresh, native, delicate tracery and tints of leaf and flower, lending (and at so little cost) that enchanting natural beauty to our garden architecture so sought after by all lovers of nature, and attained so rarely, though oftener more recently, by our best landscape professionals through these means.

I would not needlessly enumerate the long list of particularly desirable shrubs, but feel it is not out of place here to make special mention of a few which are exceptionally worthy the attention of every landscape garderer

and park and cemetery official, as well as nurseryman and florist, in this country and abroad: The AZALEAS, with their masses of brilliant, pure colors and delightful fragrance; the Andromedas and Leucothæs, fringed with their panicles of tinted bell-flowers; the dense-foliaged Calycanthus, whose abundant, chocolate-colored flowers emit such a peculiar, fruity odor; the Stuartias, covered with large, showy flowers—the "native American Camellia"; Viburnums, the large leaves coloring so richly at first hint of autumn; the Chionanthus, drooping its delicate, white, fringe-like racemes, overcharged with a wild perfume; and the little hardy Xanthorhiza, its peculiar, modest brown flowers in pendulous racemes below the conspicuous pinnate leaves, which color a bright orange in autumn.

The Rhododendrons and Kalmias, however, might well claim the lead in shrub ornamentals, combining, as they do, the dark, broad, evergreen foliage with their profuse trusses of brilliant-stamened flowers. Massed or singly, they possess at all seasons a special charm of their own, and we know of no ornamentals, native or exotic, that can take their well-earned place in gardening. Then, for yellow effects we might name the Hypericums, Diervillas and Hamamelis, but will cut short the list and give a brief description of each in order.
